

MAHMOUD ABDELAZIZ

mabdulaziz499@gmail.com | Doha – Qatar

Profile

AI/ML Engineer with strong experience building, optimizing, and deploying end-to-end machine learning and LLM-based systems across enterprise and government platforms. Skilled in full MLOps lifecycle from data ingestion and training to deployment using modern AI frameworks and cloud environments. Proven ability to contribute to innovative projects, handle large datasets, working with cross-functional teams and collaborating with stakeholders to deliver impactful technology solutions tailored to industry-specific challenges, and lead teams in high-pressure situations.

Experience

AI Developer, *Mannai Corporation QPSC* (Full Time - Oct 2023 - Current)

- Designed, built, and deployed machine learning models and LLM-powered systems for large-scale business and government platforms.
- Developed automated model pipelines for LLM and NLP solutions.
- Implemented data preprocessing, feature engineering, and validation workflows for structured and unstructured datasets.
- Optimized predictive models for classification, regression, and text-matching tasks, integrating explain ability and monitoring mechanisms.

Key Projects:

- Ouqoul (Ministry of Labour) – Automated CV parsing & candidate-job matching using embeddings, NLP, and binary classification. [Ouqoul](#)
- Moawen Recruitment Platform – Built high-accuracy document verification models with OCR, LLMs, and secure ML deployment pipelines.
- AI-based Document Processing and RAG (GAC Qatar) – Designed model pipelines with model drift detection and retraining logic.
- Information extraction system from Arabic cheque, an Arabic OCR-based information extraction system integrating YOLOv8 and Qwen2-VL LLM.

-
- Built an AI-driven job-resume matching system using TensorFlow, Universal Sentence Encoder, and deep learning techniques.
 - Developed a signature and stamp verification models for MOCI Qatar, improving document security and fraud detection.
 - Developed a comprehensive AI-powered communication platform for Kahramaa and MOCI, integrating an advanced chatbot with cognitive AI capabilities and a dynamic 'talking head' feature, which converts Arabic textual input into realistic speech and synchronized visual animations, significantly enhancing user engagement through interactive multimedia experiences.

Application Engineer, *GISCON (Contract - Oct 2023 – Mar 2024)*

- Conducted training workshops and AI system integration for clients at Kuwait Pavilion, Expo Doha 2023.

Research Assistant, Qatar University (*Volunteer - Sep 2023 – Apr 2024*)

- Developed AI-powered vehicle speed detection systems using computer vision and deep learning, eliminating radar dependency.
- Conducted research on AI applications in education and machine learning-driven intelligent tutoring systems.

STEM Educator, *Qatar Scientific Club (Part Time – June 2023 – Aug 2023)*

- Teach and inspire students in the areas of Robotics, Artificial Intelligence (AI), Coding, Mobile App Development, and Cyber Security.

Last Mile Area Lead, *Supreme Committee for Delivery and Legacy (Contract - Sep 2022 - Oct 2022)*

- Responsible for the design and analysis of DOT plans and training the workforce on them. Managed large-scale projects and ensured optimal data quality and compliance with organizational targets.

IT Specialist, *AFIS (Full Time - Aug2022 - Aug 2022)*

- Developed IoT-based AgriTech solutions, applying AI models for predictive analytics and system automation.

Education

Qatar University, Doha - Qatar | Bachelor of Science in Computer Engineering | Sep 2017 – May 2022

Google, Remote | GenAI – Technical | Dec 2024 – Jun 2025

Key Skills and Characteristics

- Artificial Intelligence & Machine Learning: LLMs, GPT Fine-tuning, NLP, Deep Learning.
- Programming: Python, TensorFlow, PyTorch, C++.
- Hardware & Performance: NVIDIA GPUs, CUDA fundamentals, model optimization & benchmarking
- Data Engineering & AI Deployment: Cloud Platforms (GCP) and Docker.
- Database & Storage: SQL, NoSQL, Google Firebase.
- Languages: Arabic (native), English (expert).

Other Things:

- MATLAB
- MCU Hardware: Arduino, Raspberry Pi 4 and ESP32.
- Operating System: Windows, Linux, and Mac.

Certificates

Professional Machine Learning Engineer – Apr 2025

Management – FIFA – Sep 2022

Flutter Development – May 2022

HCIA-AI - Aug 2020

HCIA-Datacom – July 2020

HCIA-Storage – July 2020
